Smithfield Kinston Facility Expansion

Image # 120918 0106  
Date 09.18.12

**Project Description:** The scope of work included 130,000 Sq. Ft Plant Expansion for food processing plant. The Electrical scope included medium voltage underground power distribution switches and pad mounted transformers, 480V switchboards and power distribution, multiple motor control centers, and refrigeration control panels. An Arc Flash Hazard Analysis was performed for the entire facility to include the existing plant in an effort to mitigate hazards and bring up to date.
